No endorsement of mentioned products or firms is intended nor is criticism implied of those not mentioned.

All prices in this publication were collected in central Iowa, Spring 2012. Although prices vary depending on date and location, the comparative differences generally follow a similar pattern.

Grains

Grain products are foods made from wheat, rice, oats, cornmeal, barley, or any other grains. According to MyPlate and the Dietary Guidelines for Americans, children need about 3 to 6 ounces of grains a day; teens and adults need 5 to 8 ounces.

In general, a 1-ounce equivalent is:

1 slice of bread	½ of an English muffin
1 cup of ready-to-eat cereal	1 4½-inch pancake
1 6-inch tortilla	7 square or round saltines or snack crackers
½ cup of cooked rice, cooked pasta, or cooked cereal	

The Dietary Guidelines for Americans recommend half of our servings be whole grains. Whole grains have been shown to reduce the risk of heart disease, cancer, and diabetes. Whole grain foods include all parts of the grain—germ, bran, and endosperm. Refined grains contain just the endosperm.

Spend Smart: strategies for bread

Look for whole grain

Whole grain products may cost a few cents more but the added nutritional value makes them a smart buy. Use these clues to make sure you get the whole grain you pay for.

- Choose products with whole grain listed as the first ingredient: whole wheat, whole rye, whole grain corn, whole oats, oatmeal, brown rice, wild rice.
- Do not be fooled by color. Caramel coloring may be added to give some bread products the appearance of being whole grain.
- Read the Nutrition Facts label. Whole grain products generally have at least 3 grams of fiber per serving.

Be patient and experiment

If your family prefers, or currently eats, refined bread and crackers, start with products that list both *whole wheat* and *enriched flour*.

Consider shopping at a day-old bread store

Check the prices and stock up if you have freezer space. Prices can be at least one-third to one-half less than the grocery store.

Protect your investment – store and use bread wisely

- Store bread you will use soon in an airtight container at room temperature. Freeze the rest in airtight packaging and use within 6 months. Do not refrigerate; this draws moisture out of bread so it becomes stale more quickly.
- Use nearly-stale bread for French toast, stuffing, bread crumbs, or croutons.

Spend Smart: strategies for grains

Less than \$.10 per ounce

- Baking Mix \$.05
- Brown Rice* \$.06
- White Rice \$.06
- Store brand popcorn, bag* \$.06
- Store brand oatmeal* \$.06

- Name brand honey and nut oat cereal \$.27
- Flour tortilla \$.28
- Brown and serve rolls \$.29

More than \$.30 per ounce

- Name brand wheat cracker* \$.41
- Bakery cookies \$.42

• Whole grain items (in blue) are available in each price range.

As you look at the chart above, consider

- Whole grain choices are available in each cost category.
- Sugar-coated cereals and those with fancy flavors and shapes usually cost more and are less nutritious than plain forms.
- Instant hot cereals in individual serving packets may be more than three times the cost of the same cereals in larger boxes.
- Store-baked products (such as cakes, muffins, biscuits, and cookies) usually cost more than purchasing and making from a mix.

Ideas

- Try the store brand. Do a blind taste test to see if your family can really tell the difference. They may be requesting foods because of the advertising or packaging.
- You can cook many hot cereals in a microwave oven for the same amount of time it would take to make an "instant" cereal. This "make your own" version will be more nutritious and less costly. If your family likes the flavor and convenience of the instant oatmeal packets, add sugar, dried fruit or cinnamon to the oatmeal and store in an airtight container. Check package label for microwave cooking directions.
- Prepare rice and noodle side dishes with your own seasonings. Mixes do not save much time because the cooking time is the same for homemade and mixes.
- Consider popcorn for a whole grain snack. Compared to other snack foods, it is low in calories, high in fiber, and is a bargain— if you use a hot-air popper or a pan on the stove. A half cup of kernels makes about 8 cups of popcorn.

Answers: Check your \$-saving skills

1. Whole wheat flour and 100% whole wheat
2. Store brand Honey O's (\$.21/oz.)
3. Store brand quick oatmeal (\$.04/serving)
4. Store brand complete pancake mix
5. Frozen bagels are \$.50 each or \$.18 per ounce
